Q_4199 Please select the primary sector or characterization that best defines this project.

Environment

Q_4198 Please select the secondary sector or characterization that best defines this project.

Municipal/Government

Project Description

Q_575 Project Description. Concisely describe the project, indicating the location, what will be planned, designed, acquired, and/or constructed, the issues/opportunities to be addressed, and expected outcomes and deliverables. Additional details will be collected later in the application process.

The Village of Malone has begun construction on a new Department of Public Works (DPW) building within the Village limits. The existing DPW facility, located at 90 College Avenue, is suspected to have salt and potentially oil contamination due to storage of materials on site since XXXX. The site is adjacent to a local fishing and recreational pond in addition to being located on the Salmon River.

Upon completion of construction of the new DPW facility, the Village is exploring opportunities to demolish the existing facility and creating a park and recreation area due to the proximity to the adjacent pond and Salmon River. However, due to suspected contamination of the site with salt and oil the Village is submitting the Brownfield Opportunity Area application through the Consolidated Funding Application.

The existing site is located within the Village of Malone within an Environmental Justice area and would greatly benefit Village residents to be converted to a park and recreation area. The Village plans to utilize the funds available through this program to investigate the suspected contamination and submit a BOA Nomination to the Department of State of New York for approval.

Q_976 Statement of Need

The Village of Malone is an economically distressed area and the existing DPW facility is located within an Environmental Justice area. Due to the cost of the new DPW garage and ongoing infrastructure improvements needed within the Village (water, sewer, storm, roads, etc) the Village does not have the funds to prepare a BOA Nomination for this facility.

Additionally, the proposed park and recreation area would greatly benefit the Village rather than the existing DPW facility remaining as an unused facility. The letters of support clearly indicate that this type of development in the proposed area of the Village would improve the health and well being of the public and also clean up a suspected area of contamination due to salt and oil storage on site.

Q_2366 How does your project align with the Regional Economic Development Council's Strategic Plan/Upstate Revitalization Initiative Plan? (strategic plans are located at <https://regionalcouncils.ny.gov/>)

One of the key priorities for the North Country is identifying and addressing Environmental Justice areas as outlined in the 2019 progress report. The proposed project is located within an Environmental Justice area and is suspected to be contaminated with road salt and potentially oil from storage on site. Securing a brownfield opportunity area nomination grant will allow for the Village to investigate an area that is suspected to be a brownfield with a vision to create a park and recreation area on the Salmon River. Focus will be on development of the site to promote wildlife education particularly as it relates to connecting youth to their local environment and conservation

efforts to maintain the health of local trout habitats.

Q_930 Explain what makes your project a regional economic priority - for example creates jobs, economic investment, sustainability and community revitalization, government efficiency or consolidation etc.

The proposed project will create temporary construction jobs during the project build, however more importantly with increase sustainability and community revitalization within the Village. As a significant resource within the Village, the Salmon River, and the proposed park and recreation area will provide increased access to the river in addition to being an education area for local youth. Environmental conservation education will become a focal point within the downtown area as the proposed site is only a 15 minute walk from the Middle School and the Franklin Academy High School. The area could be used as an outdoor classroom for environmental science, biology, and even engineering (hydraulics).

Q_9527 Does your project advance downtown revitalization and strategic community investment?

Yes

Q_9528 If Yes, please detail how it will advance downtown revitalization and strategic community investment.

The proposed project will redevelop the existing department of public works facility into a park and recreation area focused on the environment and the Salmon River. The site is conveniently located downtown and is easily accessible to the public including both the middle school and high school. Additionally, the site is within an Environmental Justice area and is a suspected brownfield site. By remediating the site and creating a park and recreational area the Village would be making a strategic community investment with the creation of an environmental conservation education area. Students and the public will be able to enjoy the environment and learn about environmental stewardship without having to travel outside of the Village.

Q_9529 Does your project improve access to child care?

No

Q_9530 If Yes, please detail how it will improve access to child care.

N/A

Q_9531 Does your project incorporate environmental justice practices?

Yes

Q_9532 If Yes, please detail how it will incorporate environmental justice practices.

The proposed project will follow the New York State DEC's "Operation ECO Quality" initiative to improve the community's quality of life and reduce public health risks. As the

area is a suspected brownfield and located within an environmental justice area, remediating the site will bring the area into compliance with environmental conservation laws and regulations while forming a partnership with the DEC and the community. The proposed project will also investigate the installation of green infrastructure as an education tool for the community in addition to the previously mentioned education initiatives.

Q_3762 Does your project directly address the needs of people in your region who are living in poverty and who seek resources for inclusion in the economic life of New York State?

No

Q_3763 How does your project seek to apply CFA funds for the purpose of eliminating barriers to skilled employment by poor people in your region, as identified by the Opportunity Agenda? Please describe any efforts to collaborate at the local or regional level (i.e. public, private, labor, philanthropic sectors).

The proposed project does not eliminate barriers to skilled employment by poor people in the region.

Q_3764 How does your project build workforce development programs, improve physical infrastructure, and/or establish social services that connect people living in poverty in your region with skilled employment, in correspondence with the economic revitalization priorities, distressed community targets, and the industry growth areas identified in the Opportunity Agenda and Strategic Plan?

The proposed project does not build workforce development programs, improve physical infrastructure, or establish social services connecting people to skilled employment.

Q_4200 Does your project provide opportunities for Veterans' to participate in the workforce, or improve services to the Veterans' and military families in New York?

No

Q_929 Current State of Project Development (i.e. planning, preliminary engineering, final design, etc. You may enter N/A for non-project related applications)

Planning

Q_975 Estimated Project Timeline: including project start/completion dates, estimates for design, permitting and construction or other major steps. (You may enter N/A for non-Project related applications)

The overall timeline of this project is approximately 3-4 years (from the date of this application) and is currently in planning stages. Upon receipt of funding the Village will conduct an initial meeting with the Department of State to clarify project scope, SEQRA requirements, development of a project steering committee, public engagement strategy, and M/WBE approach. Following the initial meeting the Village will hire a consultant to perform the BOA workplan, investigation, and report. It is anticipated that the draft nomination process will take approximately 1 year and be completed by December of 2022. During the development process the public will be engaged at Village board meetings, stakeholder interviews, visioning sessions, and public surveys.

Q_580 Provide a list of all federal, state, and local reviews, approvals, or permits needed or completed,

including the dates when they are expected to be completed or were completed. If Not Applicable, indicate "NA".

Brownfield Nomination Area approval by the New York State Department of State. The grant application is to prepare a BOA Nomination application.

Q_2364 What is the status of State and/or Federal Environmental Review? If review of the project is underway or completed pursuant to the State Environmental Quality Review Act (SEQRA) or National Environmental Policy Act (NEPA), please indicate the lead agency (if applicable).

N/A

Q_1054 If National Environmental Policy Act (NEPA) Record of Decision has been issued, please explain (include date of Record of Decision).

N/A

Prior CFA Funding

Q_2362 If funding was awarded in prior CFA rounds, what were the CFA numbers for which funding was awarded? (separate multiple CFA numbers with commas)

N/A

Q_4160 For each program to which you are applying under the CFA, explain your strategy for proceeding if the full amount of requested funding, required matching funds, and temporary financing are not secured as expected, or committed sources become unavailable. This explanation must address any proposed project phases, and both CFA and non-CFA sources of funds.

If full funding is not secured as expected the Village will extend the timeline of the proposed project in order to self fund the project. The initial BOA application period would be extended from one year to at least two years to reduce the annual expenditure on this phase of the project. Following approval from the Department of State the Village will move forward with the planning, engineering, and construction of the proposed project. Similarly to the BOA application stage of the project this phase of the project will also be extended out at least two years. Therefore the overall project would be extended from a proposed completion date of 12/2024 to 12/2028.

Standard Question

Brownfield Opportunity Areas

Brownfield Opportunity Area Program: Grant Category

Q_12221 Indicate which of the three following grant categories you are applying for.

Development of a BOA Nomination (BOA)

Q_12271 Applicants requesting funding to develop a BOA Nomination must comply with the following minimum community participation activities prior to submitting an application. Has the applicant (1) provided a public comment period of at least thirty (30) days on a draft application; and (2) held a public meeting on the draft application?

(This question is associated with your answer selection in question: [Q_12221](#))

Yes

Q_12339 Applications to Develop a BOA Nomination The Presence and Impact of Known or Suspected Brownfields: Describe the percent of total land area in the area identified for funding that consists of known or suspected brownfields and the extent to which the proposed Brownfield Opportunity Area demonstrates: Known or suspected brownfields including (a) vacant, underutilized, deteriorated and abandoned properties; (b) evidence of economic distress, risk to public health, or other negative impacts of the known or suspected brownfields on the proposed BOA; (c) present strategic opportunities to stimulate economic development, community revitalization or the siting of public amenities.

(This question is associated with your answer selection in question: [Q_12221](#))

The existing site is approximately 8 acres (refer to map provided as part of this application). Approximately 50% of the site includes existing buildings and areas of equipment and material storage and is suspected to be contaminated with petroleum and salt. The existing buildings are deteriorated and will become abandoned upon completion of the proposed DPW facility. As this area is along the Salmon River and also contains a local fishing pond there is significant risk with buildings that may have asbestos in addition to the petroleum and salt contamination of the site. The proposed project will revitalize an area currently located within an Environmental Justice area and be a public park, recreation, and education area for the Village.

Q_11872 What is the name of the proposed Brownfield Opportunity Area?

(This question is associated with your answer selection in question: [Q_12221](#))

Existing Department of Public Works Facility

Q_12303 Describe the level of support from owners of brownfield sites within the proposed BOA and describe how the views of property owners, residents, state and local officials, and local organizations were considered in developing the application.

(This question is associated with your answer selection in question: [Q_12221](#))

The site is owned by the Village of Malone. Letters of support from residents and business owners within the region were obtained. (Describe here)

Q_12304 Describe the relationship between the applicant organization and the municipality within which the proposed Brownfield Opportunity Area is located; the organization's experience in working with the municipality; and the municipality's support for the project.

(This question is associated with your answer selection in question: [Q_12221](#))

The applicant organization is the municipality.

Q_12217 Multiple applications for the BOA Program are permitted. An application must be submitted individually for each activity. Will multiple applications for the BOA Program be submitted by this entity?

No

Q_6113 Two or more eligible applicants are encouraged to work and conduct approved activities in partnership and jointly apply for funding in support of a BOA Nomination that would improve an area of mutual interest or concern. Please indicate if this is a joint application.

No

Summary Project Description

Q_12272 Briefly describe the proposed activity. Include primary objectives to be achieved, issues or problems to be addressed, and anticipated community benefits in terms of specific economic and environmental improvements and community revitalization goals. See scoring tips on how to format your project activity description.

The Village of Malone has begun construction on a new Department of Public Works (DPW) building within the Village limits. The existing DPW facility, located at 90 College Avenue, is approximately 8 acres and is suspected to have salt and potentially oil contamination due to storage of materials on site since the 1950's. The site is adjacent to a local fishing and recreational pond in addition to being located on the Salmon River.

Upon completion of construction of the new DPW facility, the Village is exploring opportunities to demolish the existing facility and creating a park and recreation area due to the proximity to the adjacent pond and Salmon River. However, due to suspected contamination of the site with salt and oil the Village is submitting the Brownfield Opportunity Area application through the Consolidated Funding Application.

The existing site is located within the Village of Malone within an Environmental Justice area and would greatly benefit Village residents to be converted to a park and recreation area. The Village plans to utilize the funds available through this program to investigate the suspected contamination and submit a BOA Nomination to the Department of State of New York for approval.

The site is conveniently located downtown and is easily accessible to the public including both the middle school and high school. Additionally, the site is within an Environmental Justice area and is a suspected brownfield site. By remediating the site and creating a park and recreational area the Village would be making a strategic community investment with the creation of an environmental conservation education area. Students and the public will be able to enjoy the environment and learn about environmental stewardship without having to travel outside of the Village.

Brownfield Opportunity Area Program: Scope of Work

Q_12219 Three types of activities are eligible for funding as BOA projects. Describe the tasks necessary to complete the proposed BOA project. The scope of work shall clearly define sequential tasks necessary to complete either (a) Development of a BOA Nomination, (b) Undertaking Pre-Development Activities within a State-Designated BOA, or (c) Phase II Environmental Site Assessments within a State-Designated BOA. Tasks should detail what is to be done; where and how it will be done; who will do it; and approximate timeframes for each step. Please include anticipated deliverables for each task within the scope of work.

TBD

Budget Narrative

Q_12307 Provide a detailed budget narrative that identifies the specific costs included in the project

budget; explains how the budget and costs were determined; provides justification of all budget costs as being eligible, necessary and directly related to the project; and describes how the applicant will monitor expenditures to ensure the project stays on schedule and budget.

The budget identified was completed based on the example work plan document tasks as identified in question 12219. The Village plans to monitor expenditures through monthly progress reports which would include progress and scope and budget. The Village will also utilize earned value curves to monitor the status of the project through specific financial software (BST, Deltek, etc) and work with their selected consultant to provide feedback to the DOS on progress of the project. The Village will also include the DOS in the steering committee meetings to discuss project status including both on the development of the work plan and the costs incurred to date.

Budget preparation

Q_12335 Describe how the BOA project budget and cost were determined. Relevant experience and background of all parties responsible for compiling the budget and the method/approach used to arrive at estimates should be included.

The BOA project budget and costs were developed by providing costs associated with the draft workplan developed by the DOS. The budget was prepared by Wright-Pierce Engineering Consultants, PC and Envirospec Engineering PLLC with input from the Village. These companies are both environmental engineering firms with experience in brownfield redevelopment projects, BOA applications, and horizontal/vertical infrastructure engineering evaluations and design.

Local Match

Q_12336 BOA program grants may be used for up to 90% of the total eligible costs of the project. Successful applicants will be required to provide the remaining 10% of the project cost. Describe the amount of local match that will be required and identify the source of those funds.

The Village of Malone will match 10% of the the total projected budget of \$196, 240 (\$19, 624). The source will be provided through the general fund of the Village.

Brownfield Opportunity Area Program: Indicators of Economic Distress

Q_12334 Describe the indicators of economic distress that characterize the area that is the focus of the BOA grant application.

The proposed area is the current DPW facility that will soon become vacant as a new facility is constructed. The area has been included in the Village/Town of Malone's comprehensive plan to be cleaned up and converted into a park, recreation, and environmental education area. As previously discussed the area is located in an Environmental Justice area already in an economically distressed area. Due to the suspected contamination the site will become a public risk once the facility is no longer utilized by the Village and funding is required to designate the area as a BOA.

Brownfield Opportunity Area Program: Local Capacity and Partnerships

Q_12333 Describe the local capacity and partnerships that will support and facilitate completion of the proposed project, including: (1) the extent to which an effective organizational and staffing structure exists to advance and complete the project; (2) demonstrated support for the project by multiple entities, including but not limited to municipalities, community-based organizations, and/or

NYC Community Boards; and (3) potential for the project to be carried out jointly by a municipality and a community-based organization and/or NYC Community Boards in partnership.

Since this is a Village funded project there are not any specific partnerships, however the project has complete Village support in addition to support from Franklin County and US Congresswoman Stefanik. As it relates to the Village, Mayor Dumas and Village Trustees are committed to completing the project. They have agreed to provide staff to assist the consulting engineers (to be chosen at a later date) in completing the BOA application. The overall structure for the project will be lead by Mayor Dumas with assistance from the Village Clerk (Rebahka Scaccia) and the Department of Public Works Supervisor (Steve Fredette). The Village will work closely with the consulting engineers to provide project information, assist with field work, and help prepare the final application to the Department of State.

As previously mentioned, this project is supported locally by the Village of Malone Chamber of Commerce, Franklin County (County Manager), and US Congresswoman Stefanik. With the backing and support of these individuals and groups the project will be a success. There is potential for the project to be carried out jointly by the Village and Franklin County depending on State funding availability.

Brownfield Opportunity Area Program: Public and Stakeholder Support

Q_12332 Describe the public and stakeholder support that exists for the project.

To be filled out after the public comment period.

Brownfield Opportunity Area Program: Economic Value

Q_12308 Describe the potential positive economic impact that the project will have on the proposed or designated BOA, as well as the community and the region. Consideration should be given to economic recovery efforts from the COVID-19 pandemic. Refer to question scoring tips for more information.

The overall goal of this project is to minimize negative environmental and health impacts to the public in addition to providing a regional environmental conservation education area within the Village of Malone. As the proposed site is not anticipated to add directly to the economy of the Village, the benefit as a potential tourist site could draw people from the immediate region as a trout fishing location within a downtown area. Secondary economic benefits due to increased regional travel include additional revenue generated for local restaurants and commercial businesses within the Village.

Brownfield Opportunity Area Program: Environmental Value

Q_12331 Describe the potential positive environmental impact of the project to the proposed or designated BOA, the community, and the region.

The proposed projects goal is to provide a positive environmental impact for the Village. As previously discussed the proposed site is a suspected Brownfield due to historical storage of salt and petroleum products at the existing Department of Public Works site. By designating the site as a Brownfield Opportunity Area and turning the site into a environmental conservation and recreation area the overall impact to the Village is immense. First, the site will be remediated to minimize any environmental or health hazard to the community. This inherently provides a positive impact to the community. Second, the transformation into a park and recreation area with a focus on environmental stewardship puts a clear focus on the environment and how fragile and important it is,

even within Village limits. Third, as the area is currently designated an environmental justice area, remediation of the site will help bring a focus to the environment to an economically distressed area within the Village. Overall, the proposed project provides a significant potential positive impact to both the Village and the North Country Region.

Brownfield Opportunity Area Program: Public Value

Q_12310 Describe the potential positive public impact of the project to the proposed or designated BOA, as well as the community and the region.

The existing site will no longer be utilized as a DPW facility for the Village as they are currently under construction of a new facility. By remediating the site and converting it to an environmental education and recreation area the public impact is only positive. Similar to previous discussions on this topic, the environment and public health will be addressed by remediating the site and creating a public area to enjoy the environment make the public impact the primary goal of this project.

Certification

General Certifications

Q_1037 By entering your name in the box below, you certify and agree that you are authorized on behalf of the applicant and its governing body to commit the applicant to comply with the requirements of Article 15-A of the New York State Executive Law: Participation By Minority Group Members and Women With Respect To State Contracts by providing opportunities for Minority-owned Business Enterprise (MBE)/Woman-owned Business Enterprise (WBE) participation. You further certify that the applicant will maintain such records and take such actions necessary to demonstrate such compliance throughout the completion of the project.

Andrea Dumas, Village of Malone Mayor

Q_1038 By entering your name in the box below, you certify that you are authorized on behalf of the applicant and its governing body to submit this application. You further certify that all of the information contained in this Application and in all statements, data and supporting documents which have been made or furnished for the purpose of receiving assistance for the project described in this application, are true, correct and complete to the best of your knowledge and belief. You acknowledge that offering a written instrument knowing that the written instrument contains a false statement or false information, with the intent to defraud the State or any political subdivision, public authority or public benefit corporation of the State, with the knowledge or belief that it will be filed with or recorded by the State or any political subdivision, public authority or public benefit corporation of the State, constitutes a crime under New York State Law.

Q_11894 Please select the category that describes the primary applicant from the list below. Refer to the scoring tips for more information and definitions.

Municipality

Brownfield Opportunity Area program: Project Map

Q_12220 Upload a map, or maps, showing the location of the proposed project. If the application is to prepare a BOA Nomination, the map(s) should show the proposed BOA boundary and its location within the municipality or region. If the application is for a pre-development activity within a State-designated BOA, the map(s) should depict the boundary of the designated BOA and the location of the proposed pre-development project within the designated BOA. If the application is for Phase II Environmental Site Assessment activity within a State-designated BOA, the map(s) should depict the boundary of the designated BOA and the location with a definitive address or tax parcel(s) within the designated BOA.

Phase II Environmental Site Assessment (SA) within a Designated Brownfield Opportunity Area: BOA Site Assessment Supplement Package

Q_12234 If applying for Phase II Environmental Site Assessment, a Phase II Application for Site Assessment Supplement is REQUIRED. A separate SA Supplement is required for each site for which Phase II Environmental Site Assessment funding is being requested. To access and complete the BOA Site Assessment Supplement Package go to the DOS website. Department of State guidance on Phase II Environmental Site Assessments is found in the BOA Site Assessment Supplement Package. Phase II Environmental Site Assessments (SA) applications will be evaluated on a pass/fail basis for eligibility and then evaluated per the scoring criteria outlined in the RFA Application Evaluation Criteria. Instructions are contained within the BOA Site Assessment Supplement Package. Once completed, upload a .pdf of the Phase II Application for Site Assessment Supplement to the CFA website as instructed. Please refer to the Brownfield Opportunity Area Program Request for Applications for funding related information at <https://dos.ny.gov/funding-bid-opportunities>
